

AI Developer Report

Name: vinayak wankhade

Email: vinayakwankhade647@gmail.com

AI Skill Detection

Specialization: Full Stack Developer | Backend Developer | Problem Solver

Tech Stack: JavaScript, Python, Algorithms, Data Structures, Web Frameworks (inferred)

Strengths: Exceptional problem-solving capabilities, demonstrated by successfully solving 53 LeetCode Hard problems and 732 problems overall., Highly productive and consistent project builder, with 32 public repositories developed within a two-year timeframe, reflecting a strong 'Indie developer' mindset., Strong dedication to continuous learning and skill enhancement through consistent competitive programming engagement.

Improvements: Limited public collaboration and open-source contributions, as indicated by a low follower count and absence of activity on StackOverflow or Codeforces., Opportunity to gain experience in formal team-based software development environments and large-scale system design, which are less evident in an 'Indie developer' profile., Could broaden technical knowledge beyond primary development and problem-solving, potentially exploring cloud platforms, advanced architectural patterns, or contributing to open-source projects.

Developer DNA Profile

Personality: Problem Solver | Project Builder | Independent Developer

Working Style: Independent | Autonomous | Project-Driven | Self-Starter

Collaboration Score: 35

Innovation Score: 85

Global Ranking

Tier: Silver

Score: 356
