

AI Developer Report

Name: Mayur Khandare

Email: mayur2006khandare@gmail.com

AI Skill Detection

Specialization: Full Stack Generalist | Project Builder

Tech Stack: JavaScript, Python, Frontend Frameworks (e.g., React/Vue), Backend Frameworks (e.g., Node.js/Django/Flask), Databases (e.g., MongoDB/PostgreSQL)

Strengths: Highly prolific in project creation with 39 public repositories in 2 years, demonstrating strong practical development skills., Consistent problem-solving efforts, having solved 93 LeetCode problems including 12 hard ones, indicating a solid grasp of algorithms and data structures., Proactive learning and building, evident from sustained activity across GitHub and LeetCode over a 2-year period., Strong foundational development skills as reflected by a 'development' score of 510.

Improvements: Significantly increase engagement in knowledge-sharing platforms like Stack Overflow to improve 'knowledge' score and reputation., Deepen problem-solving skills in competitive programming beyond LeetCode, by exploring platforms like Codeforces to tackle more complex algorithmic challenges., Enhance collaboration and community interaction by contributing to open-source projects or engaging with other developers on GitHub (currently low followers)., Explore and gain experience in cloud technologies (AWS, Azure, GCP) and system design to advance engineering maturity., Focus on specific areas of specialization to move beyond generalist roles, e.g., becoming an expert in a specific frontend framework or backend technology.

Developer DNA Profile

Personality: Project Builder | Problem Solver | Full Stack Generalist

Working Style: Independent | Project-Driven | Learning-Focused

Collaboration Score: 20

Innovation Score: 75

Global Ranking

Tier: Bronze

Score: 190
