SUMMARY

Aspiring Full Stack Developer skilled in JavaScript, MERN, API development, and testing fundamentals. Experienced in building scalable applications, LLM-powered automation tools, and secure backend systems. Strong problem-solving foundation with 600+ DSA problems and hands-on project experience.

EDUCATION

Vishwakarma Institute of Technology, Pune
Bachelor of Technology in Information Technology

2022– Present
CGPA: 8.2

PROJECT EXPERIENCE

Autonomous API Testing Framework (LLM-Powered)

Mar 2025 – Oct 2025

FastAPI, React.js, LangChain, RAG, Reinforcement Learning, WebSockets

- Developed an **LLM-driven API testing system** using **RAG pipelines** to automatically generate, execute, and validate test cases.
- Built a **Reinforcement Learning–based self-healing module** that improved automated test coverage by **40%**.
- Engineered a **FastAPI backend** with real-time **WebSocket analytics** for monitoring test execution and anomaly detection.
- Designed a **React.js dashboard** for orchestrating test runs and visualizing insights, increasing developer productivity by **25%**.

EduTrack – Smart Learning Platform

Dec 2024 – Mar 2025

MERN Stack (MongoDB, Express.js, React.js, Node.js, JWT, Cloudinary)

- Built a scalable **LMS** supporting **1,000+ learners** and **100+ dynamic courses** with progress tracking, real-time analytics, and responsive dashboards.
- Architected a modular backend with optimized controllers, efficient routing, and MongoDB indexing—reducing average API latency by **40%** under load.
- Implemented secure **JWT authentication** and integrated **Cloudinary** for reliable media management, improving content delivery performance and platform stability.

SoundHive – Premium Audio Store

Apr 2025 – Jun 2025

React.js, Node.js, Express.js, MongoDB, JWT, Stripe API

- A modern audio marketplace enabling real-time product updates, seamless checkout, and a scalable CMS-driven backend.
- Built a secure authentication system using **JWT**, **bcrypt.js**, input validation, and rate-limiting, reducing unauthorized access attempts by **22%**.
- Integrated **Stripe** with webhook-based payment flows and PCI-compliant handling, while optimizing MongoDB indexes and pipelines to cut API latency from **420ms → 285ms**.
- Implemented real-time incident status updates and automated CI/CD pipelines via **GitHub Actions** for testing, containerized builds, and zero-downtime deployments.

TECHNICAL SKILLS

Languages: JavaScript, C++, Python, SQL (Basic queries, CRUD), HTML, CSS

Frameworks & Libraries: Node.js, Express.js, React.js, FastAPI, LangChain, REST APIs, JWT, bcrypt.js

Databases & Cloud: MongoDB, Redis, Cloudinary, NoSQL Aggregations, Vercel Deployment

Developer Tools: Git, GitHub Actions (CI/CD), VS Code, Postman, Docker, Stripe API, WebSockets

Core Concepts: OOP, Functional & Integration Testing, API Security (validation, rate-limiting)

ACHIEVEMENTS

- Solved **600+ coding problems** and achieved a **1700+ LeetCode rating**, demonstrating strong analytical and DSA problem-solving ability.
- Awarded **Best Student Award (twice)** and participated in the **Citi Bridge Hackathon**, showcasing leadership, initiative, and hands-on technical engagement.
